

alignment.

Clicking that icon will open up a pop-up menu. Select **Small** from the Size choices and the **Right** radio button from the Alignment choices.

Once embedded in the page, the remote video can be positioned by dragging and dropping where desired within the content.

Tables

Tables can be added to the page content. Tables are a great way to display information in an easy-to-read format. To embed a table, select the **Table** button from the editor's menu. For example:

Purchaser	Apples	Oranges
Bob	5	3
Abigail	4	13

Example Table: Items Purchased at Farmer's Market

Additional Guidance on Adding Tables

Accordion

Accordions are a great way to display information by topic when the user may only need select information. To create the Accordion select **Content** > **Add micro-content** > **Accordion** from the Drupal menu.

Once you've created the Accordion, you can embed it into a Basic Page by clicking on the **Insert from Component Library** button in the text editor menu and selecting **Accordion**. This will open up a dialogue box so that you can select the desired Accordion from the Library or create a new one.

Here is an accordion list of information about how the different author types
